1 Installation

1.1 Requirements

To install our Shopware 6 "Tycoon Theme" app, at least the following system configurations are required:

- PHP 7.4 or higher
 - Shopware 6.4.0 or higher
-

1.2 Installation

There are two ways to install the plugin:

- *Adding via the App Manager in the backend*

To do this, you must first connect the App Manager to your Shopware account. After that, the plugins purchased for this domain are available to you. You can now add the plugin via "Load plugin".

- *Adding via SFTP*

Download the .zip file of the plugin from your Shopware account and unzip it on your PC / laptop. Then you have to start an SFTP client and copy the unzipped folder into the following directory of your Shopware installation:

SHOPWARE_ROOT_VERZEICHNIS/custom/plugins/

After both variants you still have to install the plugin. You can find the added app under "Themes" and can install it via the context button and then activate it.

Meine Erweiterungen

[Erweiterung hochladen](#)

The screenshot shows the 'Meine Erweiterungen' (My Extensions) page. At the top, there are tabs for 'Apps', 'Themes' (which is highlighted with a red box), 'Empfehlungen', and 'Shopware Account'. Below the tabs are filters: 'Inaktive Erweiterungen ausblenden' (unselected) and 'Zuletzt aktualisiert' (dropdown menu). A list of extensions is displayed, with the 'Tycoon Theme' by 'Martini Webdesign' selected. The extension details are shown: Version 1.0.0, an 'App installieren' button (which is also highlighted with a red box), and a three-dot menu icon. To the left of the extension details is a small preview thumbnail.

Figure 1 - Install the app

The screenshot shows the 'Meine Erweiterungen' page again, but the 'Tycoon Theme' extension is now listed as installed. It shows the same details as Figure 1, but with the status 'Installiert am 11. September 2022 um 08:31 Version: 1.0.0' instead of the 'App installieren' button.

Figure 2 - Activate the app

Then you have to assign the theme to a sales channel. To do this, go to your sales channel and click on the "Themes" tab and then on the "Change Theme" button.

Figure 3 : Changing Theme 1

In the window that appears, select the theme "Tycoon Theme" and click on the "Apply Theme" button.

Figure 4: Changing Theme 2

2 Setting up the theme

2.1 Open Theme Settings

Once you have selected the theme, the button "Edit Theme" will take you to the theme settings

Figure 5 - Opening Theme Settings

2.2 Set Colors

2.2.1 Theme

Here you can set the colors of the theme:

- Primary color: Main color of the theme
- Secondary color: Second color of the theme
- Frames: Colors of the standard frames
- Background: Background color of the theme (except header and footer)

2.2.2 Status Messages

Here you can set the colors for the different Shopware status messages

2.2.3 Writings

Here you can set the colors of the headings and the main text

2.2.4 E-commerce

Here you can set the colors of the shop area

2.2.5 Conversion header area

Here you can set the background and text color of the conversion header area

2.2.6 Footer

Here you can set the background and text color of the footer area

2.2.7 Header

Here you can set the colors of the header area:

- Background of navigation
- Text colors of the navigation
- Flyout menu background color
- Flyout menu text color
- Background color of the anchored menu

2.2.8 Slider

You can make the color of an overlay of the slider images here, if you want to use the e.g. bright images with bright font colors in the header area.

Here you can make the settings for up to five sliders in total:

- Layer background color
- Heading color in the layer
- Text color in the layer

2.3 Set fonts

Here you can store your desired font for the main text and the headings. By default, the shopware standard font "Inter" or "sans-serif" is used. You can also embed Google Fonts. Activate the Google fonts, go to the page <https://fonts.googleapis.com>, choose a suitable font and enter a font name in the field.

Figure 6: Insert Google Fonts

Please note that for GDPR reasons, the Google fonts in the frontend are only loaded after acceptance of the "Google Webfonts" cookie. If the cookie is rejected, the above-mentioned fallback fonts appear.

However, you can deactivate the cookie banner and still have the Google fonts loaded. To do this, you have to go to the settings of the mart1BaseApp and deactivate the following option:

2.4 Set Logos

Here you can upload / insert your different logos in the respective fields.

2.5 Set header area

2.5.1 Main

Here you can set whether the header should be displayed over the entire width of the screen or up to a maximum of 1400px wide

2.5.2 Conversion header area

Here you can switch the conversion header on or off and insert up to 4 options in the conversion header. To add the icons you can use the following GIF as instructions:

Figure 9: Integrating icons into conversion headers

2.5.3 Navigation

Here you can set whether the menu should remain "stuck" at the top of the page when scrolling.

2.5.4 Slideshow

Here you can set the basic settings of the slider as well as the content of the slides.

2.6 Set product listing

2.6.1 Product columns

Here you can set the number of products per row for the respective device size.

2.6.2 Product Display Settings

Here you can set which product properties should be displayed in the product listing.

2.7 Adjust footer area

2.7.1 Basic

Here you can make one of 3 finished footer layouts, as well as further settings for the display of the footer.

2.7.2 Payment Providers

Here you can use the pre-installed images. You can also upload your own images or remove unneeded ones. Furthermore, you can also insert links for the respective providers.

2.7.3 Partner

Here you can use the pre-installed images. You can also upload your own images or remove unneeded ones. Furthermore, you can also insert links for the respective partners.

2.7.4 Social Media

Include your social media links here.

2.8 Include your own code

In this section you can store your own CSS or Javascript code. This is loaded via footer.

2.9 Instructions

In this section you will find a detailed video for each settings area.

You can also find my channel [here](#).
